FOR IMMEDIATE RELEASE

Boxer® Introduces 950HD Compact Utility Loader
*Largest, Most Advanced Model Rises Above Competition with Many Class-Leading Features*

Winn, Mich. (February 22, 2016) – The Boxer 950HD debuts as the most advanced and capable mini-skid steer on the market. The new compact utility loader was unveiled today at The Rental Show, produced by the American Rental Association, at the Georgia World Congress Center in Atlanta.

Designed from the ground up, the 950HD includes many class-leading features previously found only on full-size skid-steer models.

“We’re redefining customer expectations with our largest and most powerful mini-skid steer, designed to lift more, lift higher and reach further, to literally rise above the competition,” said Jason Showers, Boxer Product Manager.

The 950HD features the industry’s highest hinge pin height at 95.5" (2.4 meters), allowing it to easily dump over a 6' (1.8-meter) side wall, as well as a class-leading 48-HP (36 kW) Tier 4 Final diesel engine with Diesel Oxidation Catalyst (DOC) that does not require after treatment. The 950HD’s tip capacity of 2,734 lbs. (1238 kg) and 35% SAE rated operating capacity of 954 lbs. (432 kg) provide the power for even the toughest jobs.

The unit also has an advanced electronic display with onboard diagnostic capabilities; multiple mode settings and two joystick operation patterns, allowing the operator to tailor the machine to the application. The machine’s hydrostatic operating system allows proportional control of the joysticks with variable speed output.

The 950HD was designed to be operator- and maintenance-friendly, with push-button dual press relief blocks for ease of hooking up hydraulic-powered attachments, and rear service panels for easy access to remote-mounted oil and fuel filters and electrical components.
The spring-cushioned ride-on platform provides operators with improved ergonomics, increased attachment visibility and creature comforts such as operator hip and thigh padding, cup holder and 12-volt auxiliary power supply.

About Morbark:
Morbark, Inc., based in Winn, Mich., has been innovating and manufacturing durable, high-performance equipment for the forestry, recycling, tree care, sawmill and biomass markets for more than 50 years. Morbark equipment helps customers harvest, process and convert wood and other organic waste materials into valuable, useful and profitable products. The company produces a full line of whole tree and waste wood chippers, flails, brush chippers, horizontal and tub grinders, sawmill equipment, material handling systems and more. Visit www.morbark.com, “Like” us on Facebook, follow us on Twitter (@morbark) or subscribe to our YouTube channel.

About Boxer Equipment:
Boxer Equipment has five model series available: the new X7 chipper, the 100 series dedicated trencher and the 300, 500 and now 900 series compact utility loaders, built to handle a full complement of more than 50 universal attachments. The Boxer’s standard quick-attach system enables the user to quickly and easily switch from a bucket to forks to auger or other tools for optimum on-the-job flexibility and bottom line performance. A feature unique to the Boxer 500 series is its variable-width, rubber track undercarriage, which allows the units to enter through gates as narrow as three feet wide.
